

Reverse Osmosis Drinking Water System

- Delicious, sparkling-clear drinking water
- Convenience: Fresh, clean water ready at your faucet
- Pristine, flavorful coffee, tea and juice
- Quality water for your aquarium
- Cleanly rinsed fresh fruits and vegetables
- Crystalline, harder and clearer ice cubes
- Prolong the life of your humidifier or steam iron
- Spotless glassware when rinsed with R.O. water
- Cost effective: No more bottled water costs
- Better tasting soups, sauces and meals
- Environmentally sound: No chemicals
- Great for your pets

Model T.F.C.-400

Four High Performance Filtration Stages...

Stage 1	Stage 2	Stage 3	Stage 4
The Sediment Prefilter protects the automatic shut-off, Activated Carbon Block Filter and Membrane from clogging with debris.	The water is then routed to an Activated Carbon Block Filter, where the chlorine is taken out to protect the refined T.F.C. Membrane.	Reverse Osmosis. This is the heart of the system. The T.F.C. Membrane substantially reduces dissolved solids and other unwanted impurities.	The final stage of filtration, an Inline Carbon Filter, reduces any remaining tastes and odors before the water reaches your glass, adding a final "polish" to your filtered water.

State-Of-The-Art Features...

- Patented Design: Exclusive manifold plate with patented channel design reduces tubing connections and simplifies installation.
- High Capacity Tank: Holds approximately 2 gallons of water without taking up a lot of space.
- Compact System: Space-saving design is ideal for undersink installations and uses a minimum of space.
- Automatic Shut-Off: Signals the system to stop making water until more is needed.
- Maximum Production: High performance T.F.C. Membrane with a rating of 50 gallons per day, (189 liters per day).
